## **1. Authentication (Login)**

The miaLINKS login screen. The merchant selects a bank and enters credentials.

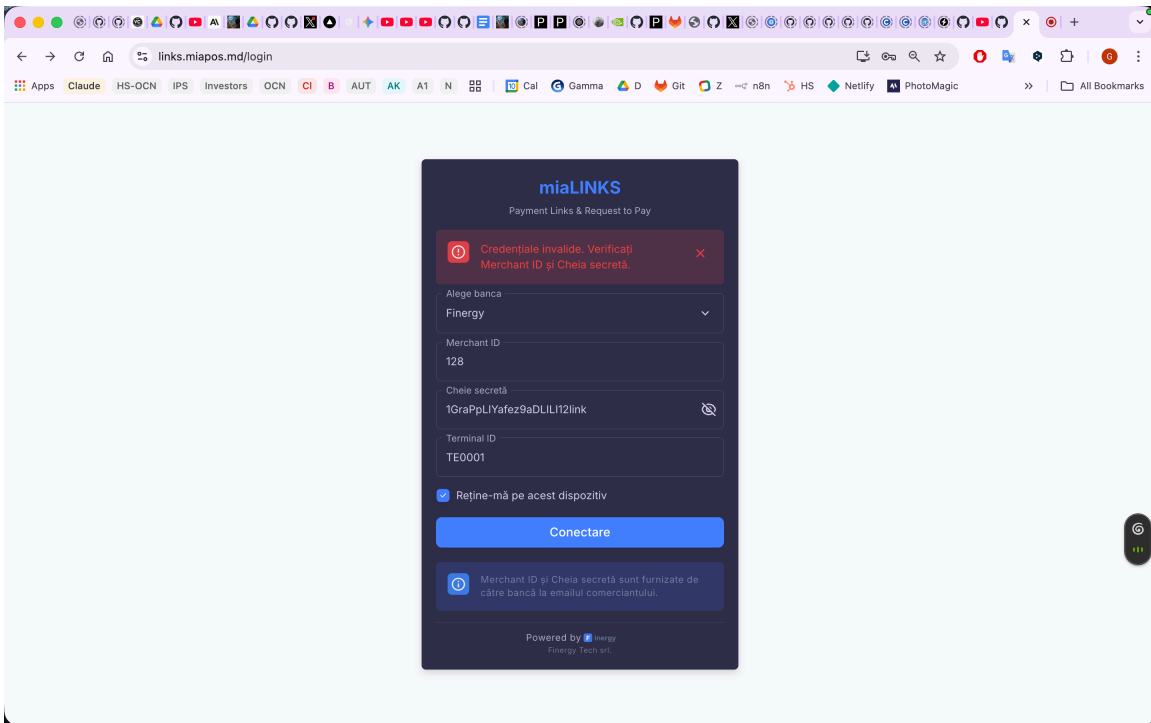

Fields:

- Select bank — choose from available banks (Finergy, MAIB, etc.)
- Merchant ID — unique merchant identifier (provided by bank)
- Secret key — authentication password (provided by bank)
- Terminal ID — terminal identifier for operations
- Remember me on this device — saves credentials for quick login

## 1.1 Authentication — Login Error

Example of authentication error — invalid credentials. The system displays a clear error message allowing the user to correct their input.

## 2. Dashboard

Main screen after login. Overview of merchant activity.

Stat cards:

- Total payments — total number of transactions
- Total amount — total processed volume (MDL)
- Success rate — percentage of successful transactions
- Active links — payment links awaiting payment

Sections:

- Payment Links — quick access to create payment links
- Request to Pay — quick access to send payment requests
- Recent transactions — latest operations with status and details

The screenshot displays the miaLINKS dashboard for a merchant named Finergy Tech. The dashboard is dark-themed and includes a sidebar with navigation options: Dashboard, Operatiuni, Link-uri de Plata, Cerere de Plata, Tranzacții, Configurare, and Profil. The main content area features a welcome message, a '+ Link nou' button, and four stat cards: Total plăți (5), Sumă totală (1,460 MDL), Rată succes (80%), and Link-uri active (1). Below these are two action cards: 'Payment Links' with a 'Creează Link' button and 'Request to Pay' with a 'Creează RTP' button. A 'Tranzacții recente' table is shown at the bottom, listing transactions with columns for ID, Descriere, Tip, Sumă, Status, Trimite, and Data.
